Business Data Model

Entity	Business Meaning	Key Stakeholder	Decision Supported
Orders	Customer delivery transactions across regions and carriers	Operations Manager	Monitor delivery volume, delays and SLA compliance
Calendar	Date dimension used for time-based analysis	Business Analyst	Enable monthly, yearly and trend analysis
Regions	Geographic delivery areas used for operational segmentation	Regional Manager	Identify regions with higher risk, delay or cost pressure
Carriers	Logistics partners responsible for delivery execution	Carrier Manager	Compare carrier performance and identify SLA issues
Warehouses	Origin points for order fulfilment and dispatch	Warehouse Lead	Analyse warehouse contribution to delivery performance
Returns	Returned orders linked to customer or delivery issues	Customer Experience / Ops	Monitor return rate and investigate root causes

KPI Governance Rules

KPI	Definition	Rule
Delivery SLA	% of orders delivered within target	Delivery date must be within SLA target
Delay Rate	% of delayed deliveries	Delay days greater than 0
Return Rate	% of returned orders	Return flag equals 1
Avg Delivery Time	Average days from order to delivery	Exclude cancelled or missing delivery dates
